

## **Welcome to North Shore Oncology-Hematology Associates, Ltd.!**

We are pleased that you have chosen our practice to meet your health care needs. Our Physicians and staff are highly skilled professionals dedicated to the diagnosis, treatment and prevention of cancer and blood diseases.

Our practice is comprised of nine Physicians as well as two Nurse Practitioners. You may see the Nurse Practitioner at times instead of your assigned Physician. This individual is trained to manage your health and work closely with your Physician to assure you receive the utmost quality of care.

To meet your healthcare needs we are on staff at several hospitals in the surrounding area. Included are Advocate Condell Medical Center, Good Shepherd Hospital, Northwestern Lake Forest Hospital and Centegra McHenry, Woodstock, and Huntley Hospitals.

North Shore Oncology-Hematology Associates, Ltd is committed to clinical cancer research. We are an affiliate of the Eastern Cooperative Oncology Group (ECOG) which is funded by the National Cancer Institute (NCI). The trials are administered in the comfort of our office and all data is coordinated through the Robert H. Lurie Comprehensive Cancer Care Center at Northwestern University.

In order to provide you with as many resources as possible and additional information about our practice we have created a website at [www.northshoreoncology.com](http://www.northshoreoncology.com). We have done our best to compile these tools and make it easily accessible. On our website you will find information about our Physicians, staff and offices; as well as resources to help educate you about your condition and financial assistance programs. While we strive to assist you with your medical and financial needs personally, there are many tools available outside of our immediate support system. The *Resources* tab on our website has an abundance of information including local and national organizations, patient assistance programs (including prescription assistance), medical information sites, medical/professional societies and Medicare resources. We hope the information you gain will be helpful!

We are open Monday through Friday from 9am to 5pm and patients are seen by appointment only. After hours phone calls are directed through our answering service and will be handled by the physician on call. All calls are directed through 847-367-6781 in Libertyville and 815-759-9260 in Crystal Lake.
